

I would like to express my support for XM Radio. Me and My husband are a military family and do a lot of traveling and really benefit from listening to XM radio for its traffic and weather channels. We travel all over the US to visit family in friends who live far away and we love this XM Radio. I pay for this service every month and don't see why there is a problem. I don't listen to the regular radio much these days b/c the reception is not very good and I as a consumer now I can choose when I would like to hear the news, traffic and weather. As a consumer I feel that is my choice. Thank you for allowing my opinon on this topic.
